

Silk Road

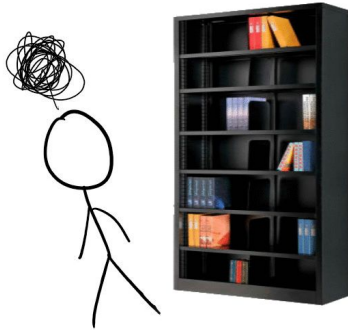

Picture This

Can't study a book you can't find

Can't play boardgames nobody has

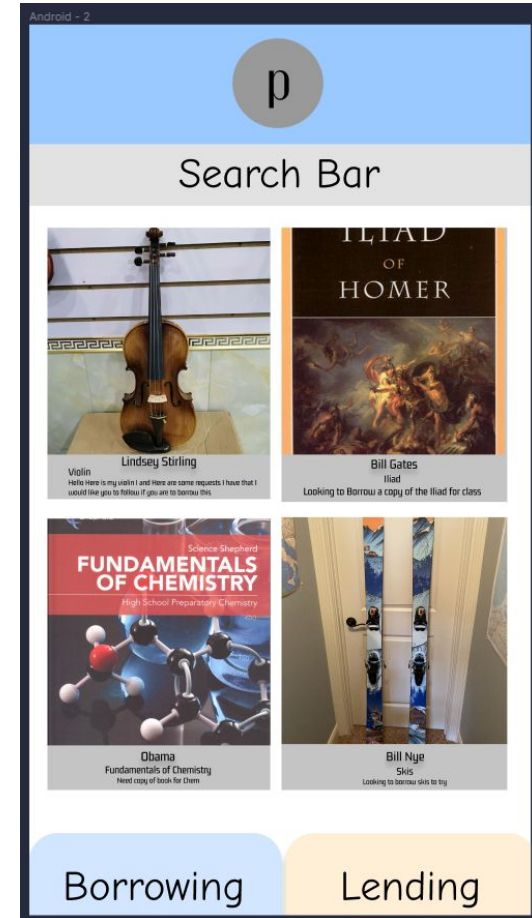

Can't rubber-duck-debug without a rubber duck

Is it really worth buying your way out of these problems?

Description

- Allows students to borrow and lend items
- Can view items that other students have listed
- Can list your own items for other students to view
- Communicate to arrange time and place for the item to be exchanged

What we've done

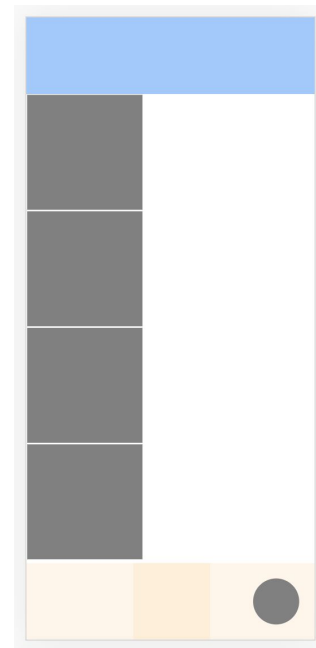

Frontend:

Backend:

 <p>Toasters (Tom Scott not inclusive) Category: electronics Lender: Lauren</p>	 <p>Dustpan & Broom Category: household Lender: Lauren</p>
 <p>Dr Seuss Book Category: book Lender: Afnan</p>	 <p>Industrial Deep-fryer Category: cooking Lender: Jason</p>
 <p>Hammer Category: tools Lender: Afnan</p>	 <p>Officer Bailey from Ghost Trick: Phantom Detective Category: other Lender: Jason</p>

What we plan to do

- A functional search bar
- Implement the trading transactional part of the application
- Implement a page to add new items to lend or request as a user
- Implement a communication feature to let users know when they have pending requests or offers

Thanks for Listening!
